WEST AND WRIGHT BUY BOTH PICTURE SHOWS.

A deal was cosummated Saturday whereby J. O. West and Chief of Police Jno. Wright became joint owners of two of Hickman's leading motion picture theatres—the Crystal, established and owned by H. N. Cowgill and the Gem, established by Geo. Bouck and wife (the later deceased) and owned by N. R. Holcombe, the administrator.

Messrs. Wright and West took charge of the shows on the day the deal was made, with the latter looking after the business management. He has had considerable experience in the movie business, until recently having owned and operated the Rex Theatre at Fulton, and previous to that venture he ran the star" Theatre in Hickman. This show was later sold to Mr. Cowgill, of the Crystal. J. O. West has always made a success of the business and it is safe to predict that the two popular shows acquired will be no exception to the rule. No town in this section has better pictures or any more of them than the Gem and Crystal. It is the avowed intention of the new management to keep them right up to the high standard maintained by Messrs. Cowgill and Holcombe. For the present Messrs. Wright and West have decided to run the Gem on Saturday only. The Crystal will be run as heretofore. All serial pictures running at the Gem will be shown at the Crystal.

On Friday, Oct. 9th, a new serial "The Trey of Hearts," will be started and installments will be given each Friday night thereafter until complete. is a very facinating story with lots of thrrills and actions. Thursday, Oct. 8th, the Courier will run an installment of the story and continue it right along with the showing of the picture. It will be good reading even if you do not see it at the movies. But if you want to realize more from a story than you ever did before, read the story every Thursday and see it played Fri-

CAPT. L. D. TULLIS DIES OF PARALYSIS

Capt. L. D. Tullis, a citizen of Hickman and a well known Mississippi river pilot, died at his home in this city Saturday morning about seven o'clock as a result of a stroke of paralysis occurring the first of the week. He was unconscious several days before his death. Funeral services were conducted at the family rest dence at 2 o'clock Sunday afternoon by Rev. R. M. Walker. Burial services were in charge of the local W. O. W. lodge, of which deceased was a member, with interment at the city ceme-

Mr. Tullis was close to 62 years old. He was born in Iowa, but had been a resident of Hickman for many years. In the days of the old Anchor Line supremacy, Capt. Tullis was a pilot on one of their boats. Later he worked for the Lee Line people, but left them to take charge of the towboat John S. Summers. He had been in the employ of her owners for the past 20 years.

A wife and three children surive Mr. Tullis. His reputation in this community was above reproach and he possessed a large number of

friends who mourn his departure.

Representative Hobson introduced a resolution proposing that President Wilson call a special assembly of delegates to the third international peace conference which was to have met at The Hague, in Washington, "as soon as practicable," to attempt to end the European war. It is proposappropriation of \$150,000 for expenses was proposed.

A red-hot local option fight is on in McCracken county. Although Paducah is decidedly 'wet,'' the opinion prevails that the rural vote will swing the entire county into the dry column.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Cotarrh Suns is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

WILL ASK GOV'T LOAN ON COTTON.

A committee of southern congressmen and representatives of farmers' unions in the south is organized by Representative Henry, of Texas, to work for an issue of treasury notes on cotton that must be held over until next season on account of the demoralization of foreign markets. Mr. Henry announced that the personnel of the committee would be made up of 21 members. He said he was acting at the request of many of his colleagues from the south and that the movement had been indorsed by several organizations of cot-

Mr. Henry estimated that the surplus crop would amount to six or seven million bales and said an issue of three or four hundred millions in notes would be re-

It contained \$680,000 which the leaders were afraid to entrust to the British banks and which, for safe keeping, was sent to Europe, presumably to Germany. Anyway it is beyond their reach and in consequence the beautiful London headquarters of the union have been closed and the sign over the door says "suspended work during the European crisis.

Average prices of practically all important agricultural products on September 1st, showed an increase over quotations of one year ago, the Department of Agricultural's general review indicated. Cotton was the marked exception, dropping nearly three cents a pound.

The drug market is entering the most uncertain condition since the civil war; prices are changing almost hourly, and quotations for many drugs and chemicals of foreign origin are practieally nominal. The present war disturbances have occurred at a very unpropitious time for this country, as stocks of many important drugs here were very small, and consumers have been buying only for immediate needs. The practical tying up of the translantic ships of belligerent nations has made it mostly a gamble as to receipts and shipments, this occurring just as the movement of new crops from both sides of the oceans was beginning. A further and more serious factor in prices is the difficulty of securing exchange and discounts on bills of lading, banks abroad refusing to accept even the best commercial paper and demanding

specie settlements. It is true that a few of our business men do not believe in advertising for the simple reason 'it does not pay.'' We don't fall-out with a man on account of his belief,but we do want to ask this question. If it does not pay, why has the world not found it out years ago?

Monday night of the horrible death of Luther Sisk, who resides between Three States and East Prairie, Mo., alleged to have been killed on last Thursday by Henry Beshers and left in the woods to the hogs and wolves, the body not being found until Monday by a posse of six who were scouring the country for him. Alex Barnes, of this city, found the body in the edge of a swamp at what is known as Eagle Nest Cypress. The body was in a horri bly mangled and mutilated condition, the hogs and wolves having devoured his face off, arms, part of the legs and part of the body which was in unrecognizable condition excepting for the clothes, which were almost torn off, A hog was eating on the body at the time it was found. As wolf hair was found on him they are sure wolves had also been eating on him.

LUTHER SISK KILLED. BODY FOUND MONDAY.

Several feet from him lay his shot gun. Through the back of his head was a shot gun wound, the brains having been shot out and were gone.

It is said that on Thursday Sisk and Henry Beshers started out squirrel hunting and Beshers returned to Sisk's house, where he had been boarding, and told Mrs. Sisk that her husband had gone across the river to a houseboat and would be gone several days. He also came back in his undershirt and seemed nervous and excited and when asked by Mrs Sisk where the blue shirt was that he had worn off, he gave some excuse for having discarded it. He assisted Mrs. Sisk in getting supper, as if nothing had happened, and left that night. Mr. Sisk not returning, his wife became alarmed and said she believed Beshers had killed her husband and asked friends to go in search of him, but the body wasn't found until Monday. Besh ers was foreman of tie department of tie plant a few miles this side of East Prairie, and Sisk kept a boarding house, and the men had been paid off that day Sisk had \$68 with him when he went hunting, but when found this money was gone. found Sisk had a squirrel in his pocket that he had shot, the squirrel also being partly eaten by the hogs.

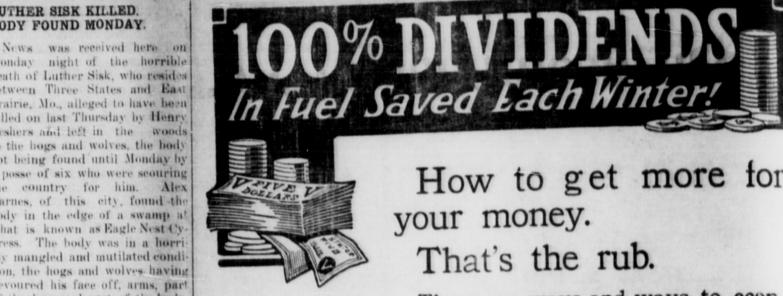

It was learned that Beshers started up through Missouri and and Sheriff J. O. King and deputy sheriff of Mississippi county started in pursuit, catenng him at a little station near Birds Point, Mo., just as he was attempting to board a Cotton Belt train and was carried back Monday to the vicinity where the crime was committed. He narrowly missed being lynched, the enraged residents of that section having gone so far as to procure a rope to hang him with, but were reasoned with and held off. and he was taken to the jail at Charleston, Mo., Mississippi, al though the deed was committed n New Madrid county. It is reported that Beshers and Sisk had had domestie troubles some ime previous but were appace ently on good terms at the time of the crime and had gone squirrel hunting together. Sisk was about 40 years old and has a wife and two children, the family coming from Dawson Springs, Ky., to that vicinity, where they kept boarding house. is a middle aged man.

How to get more for your money. That's the rub.

There are ways and ways to economize. Some do without; some buy inferior articles.

Others make a better use of the money they spend.

And that is the kind of economy we want to talk about.

Did you ever figure out how much your heat cost you?

Do you know that 95 per cent of the ordinary heating stoves utilize only half of the heat that is in the coal?

Do you realize what this wasted half costs you?

Utilize that lost half and you will make a real saving and get more heat in the bargain.

Every stove with numerous air leaking joints wastes more available heat than the stove originally cost. That waste is the gas portion of your coal and the heat that goes up the chimney in the ordinary stove. Save the gas -mix it properly with air-burn it and you develop an immense amount of otherwise wasted heat.

But it requires a stove of special construction. It must be a stove that is scientifically and mechanically perfect. It must be a stove that has no air leaks.

That stove is-

HICKMAN SCHOOLS OPEN WITH BIG ATTENDANCE.

Hickman public schools opened Monday for the years 1914-15, with an extra large attendance and most propitious prospects for a successful term.

An informal program, usual to such oceasion, was rendered, including short addresses, music, an out-line of school work, etc., which was enjoyed by a large number of visitors and patrons.

The upper grades find themselves very much crowded this year, and a request has been made to the Board for more room. Just how this problem will be solved is not known at this time. But the continued increase in attendance makes it necessary for the Board to take some action in this matter. Just the number enrolled we failed to learn, but there is a large increase over last year, which was around 800, a very positive sign that Hickman's schools are growing both in quanity and quality.

In addition to the regular course of study, our schools offer agriculture, manual training, domestic science, short hand, bookkeeping, typewriting, penmanship, art, piano and voice. proposition is being considered to add expression to the list of special work. For the past five or six years, one or more new studies have been incorporated at the beginning of each term.

of August 1, general rains began falling throughout the state. These rains have been seasonable for the last month and not excessive. It is difficult to believe that such a change in conditions could be made within 30 days. The farmers and live stock men of the state are rejoicing over the improved conditions, and a comparison of this month's report with that of last month is made to show what a great change has taken place through the state within the last month.

"The report of September 1 shows compared with 65 per cent August 1; pared with 56 per cent; dark tobacco, 12 per cent, as compared with 62 per cent. Cow peas and soy beans show a condition of 82 per cent, as compared with 64 per cent; alfalfa, 87 per nt, as compared with 65 per cent; over, 71 per cent, as compared with 55 per cent. Even fruit has been greaty improved by the rains. Live stock is given as being in better condition than a month ago. Garden conditions have increased from a condition of 51 per cent to 64 per cent.

'No one is surprised at the outcome of tobacco as a result of the rains. Tobacco is a weed and can give indiations of almost a complete failure, and with seasonable weather makes a

My back ached and I was so nervous I could not sleep, and I thought I never would be any better until I submitted to an operation, but I commenced taking Lydia E. Pinkham's Vegetable Compound and soon felt like a new woman."-Mrs. Hayward Sowers, Hodgdon, Me.

2. Charlotte, N. C.—"I was in bad health for two years, with pains in both sides and was very nervous. I had a growth which the doctor said was a tumor, and I never would get well unless I had an operation. A friend advised me to take Lydia E. Pinkham's Vegetable Compound, and I gladly say that I am now enjoying fine health."—Mrs. Rosa Sims, 16 Winona St., Charlotte, N. C.

Pinkham's Vegetable Compound and I experienced great relief in a short time. Now I feel like a new person and can do a hard day's work and not mind it."-Mrs. ADA WILT, 196 Stock St., Hanover, Pa.

4. DECATUR, ILL.—"I was sick in bed and three of the best physicians said I would have to be taken to the hospital for an operation as I had something growing in my left side. I refused to submit to the operation and took Lydia E. Pinkham's Vegetable Compound—and it worked a miracle in my case, and I tell other women what it has done for me."—Mrs. Laura A. MORE NAMES ADDED TO TRUCK-GROWING LIST.

Several new names are added this week to the list of truck growers, who have pledged themselves to raise truck and berries for the 1915 market, with Hickman as the shipping point. On ly a modest effort has been made to secure new names since our last report. Mr. Kennedy, who is looking after the signing up of pledges, and as a representative of the Young Men's Business League, confidentially believes he will secure a total of 500 or more acres in the next 60 days. Farmers seen so far have been enthusiastic regarding the truckgrowing movement, with one exception. This gentleman will sign up when given assurance that we are to have a ready market. He cited us to the movement here some ten years ago along similar lines when for some reason, according to his recollection, there was no market. So far as the present undertaking is concerned, a market is the least of our troubles. The writer made a personal investigation of this matter and found city commission merchants and whole salers already writing and wiring our committee for a chance to buy our products. To further substantiate this statement, we shall be glad to show any one. who is the leastwise doubtful, let ters from dealers in St. Louis Chicago, Memphis, Cincinnati Louisville, asking for consideration when we are ready to market our stuff. So this should sat isfactorily dispose of the question of marketing. Arrange ments have also been made for securing hampers, baskets, crates etc., at wholesale cost.

In short, the league is behind he truck movement and will leave nothing undone in the way of co-operation with our farmers and other matters which are calculated to facilitate the under aking.

We can and will make a sucess of this thing. All we need is the truck grown. If you are interested and would like to know further details, ask any member of the Business League.

High and Low Cotton Prices Since 1860

Cotton and cotton prices at this time are matters of more than passing interest in this section. In view of this fact, the Courier prints below an official table of biles raised and prices paid from 1860 to the last report which should prove interesting to all cotton raisers. How many of us know off-hand what is the highest price ever paid for cotton-the lowest-the largest and smallest yield recorded in the United States? The following are U. S. reports based on the prices paid for upland middling:
